

LM-X License Manager

CONTROL AND FLEXIBILITY IN SOFTWARE LICENSING

LM-X License Manager lets you **protect your products against piracy** by enforcing various levels of security, save time, and reduce business risks. When coupled with License Activation Center (LAC), LM-X provides a complete license management solution that greatly simplifies license creation and activation.

With one of the widest ranges of platform and language support, LM-X License Manager allows ISVs to quickly and effortlessly reach new markets and customers, driving sales and increasing revenue.

Key Highlights

TAILOR YOUR LICENSING MODELS TO YOUR CUSTOMERS' NEEDS

LM-X lets you license your application any way you want and alter licensing policies on a per-customer basis so that you can focus on your customers' needs. Supported LM-X licensing models include network/floating, single-user/node-locked, trial, time-limited, pay-per-use, and token-based licenses.

EXCELLENT USER EXPERIENCE

LM-X License Manager includes many features that make LM-X-protected software more attractive and reliable to end users; grace licenses let your users continue using a network license for a specified period of time when the license server is down, ensuring uninterrupted access to your application so they can complete and save their work.

LM-X also offers a number of features that give end users flexibility in managing their own licenses. End users can activate products, upload license files, view license usage statistics, and edit configuration files, all without involving vendor support staff.

SUPPORT FOR MULTIPLE PLATFORMS

You can run LM-X on all major platforms, including Windows, Linux, Mac OS X, Solaris and [many others](#). Even if you have customers who want to install the LM-X license server on a platform that you don't have in-house, you can use a license server pre-compiled for that platform.

TRANSITIONING FROM FLEXNET? NO PROBLEM

Transitioning to LM-X from legacy license management systems is straightforward, and our customers have found that LM-X is easier to maintain than other license managers. In addition, LM-X includes many features that make LM-X protected software more attractive to end users, without the enterprise costs.

POWERFUL INTEROPERABILITY

LM-X integrates with other X-Formation products to provide a complete end-to-end license management solution. License Activation Center (LAC) delivers centralized software license management for vendors and online license activation for end users. License Statistics monitors, processes, and produces reports on software license usage. By combining LM-X with LAC and License Statistics, you can gain complete control over managing your software.

LM-X License Manager

What Our Customers Say

“As a leading global provider of simulation technology for more than 20 years, Altair realized the importance of moving to a new, modern licensing system. With more than 3,000 Altair software customers worldwide, we evaluated several products and eventually selected LM-X. Our decision was based on many factors including cost, functionality, multi-platform availability and the confidence we had in the company’s ability to support their product.”

The product has all the features we desired, and they continue to listen to us closely for our future needs as well. We expect to have a lasting partnership with X-Formation well into the future.”

Steve, Fine Director & Program Manager, Software Licensing Altair Engineering, Inc.

X-Formation Customers

X-Formation’s products are used by small to large businesses around the world, including Fortune 500 companies and other billion-dollar corporations. We are proud that Altair, Enventive, Hex-Rays, and many other businesses are satisfied vendors of LM-X.

In addition, more than 50,000 licenses have been deployed to end user organizations, such as Ford, Boeing, Porsche, Lockheed Martin and many others.
